

Leading Remote Scrum Teams - LRST

Remote team environments are complex, and team-complexity is often amplified by complex work. Scrum is a lightweight process framework suitable for leading remote teams. Designed to improve output through emphasizing team dynamics, well-formed Scrum teams are renowned for adapting-to and capitalizing on their environments, enabling a greater focus on workflow.

3Back's leading *Remote Scrum Teams* training provides the tools and information necessary to help your company's teams implement scrum-based tactics. In this course, students will use a robust simulation that provides an intensive hands-on experience combined with a solid conceptual foundation. This combination results in graduates of *Remote Scrum Teams* who are capable of making well-informed decisions based on evidence.

Hands-on applied course.

Agenda Topics

The ½ day Leading Remote Scrum Teams class is an intensive applied session designed to help participants immediately apply improvement steps to their current situation.

Who Should Attend

There is no right or wrong person to attend Scrum training. In fact, the most successful agile adoptions have included training for everyone, right down to Finance and Sales staff.

Scrum training is especially appropriate for anyone in the corporate structure dealing with rapidly changing demands. In a traditional organization, these roles include:

Developers	CXOs	Stakeholders
Testers	Architects	Analysts
Directors	Designers	QA Staff
Project Managers	Technical Writers	Engineers
Program Managers	SMEs	Product Managers

Why Scrum Training?

Time = Money - Transforming your team or organization to a new methodology is a big undertaking. Organized training will provide the kickstart you need and save valuable time otherwise wasted on costly trial and error.

Stop attrition - Increase employee retention by creating a work environment where teams feel valued and empowered.

Compete with the best - Bring your products to market faster by learning to adapt to the market's changing desires.

Delight your clients - Learn valuable skills to help you determine what your customers really want out of their software as well as techniques for delivering it within budget.

Better information retention - Studies show that when learners "do and say," they experience an increase of knowledge retention up to 80% over reading alone.

Build skill, not just knowledge - Books and blogs are good knowledge resources. Skill, however, is acquired by doing. There is simply no replacement for the skill building that occurs with hands-on activities and real-life simulations.

What Our Clients Say

"This is my 3rd agile transition but the only one where I've invested in training for the whole team. I can't emphasize enough how much that helps. Even when we struggle we all have the tools to talk about what's the problem, even if we can't quite get to a solution easily... The biggest win, so far, has been that my boss has greater insight and thus greater trust in us... It's made my relationship with him stronger."

-- Robert, VP of Engineering

About 3Back

3Back was founded with the vision to assist organizations from around the world in recognizing the power of their teams. With over 50 years of combined experience working directly on and with Scrum teams, 3Back's goal is to help organizations build and dramatically improve the proficiencies needed for development in a demanding business marketplace.

3Back offers training, coaching and consulting in all aspects of agile product development with an emphasis on the importance of engaging the human side of the equation (the Team) to produce results. At 3Back, we make teams better.
